

TWO LITTLE FISHIES BY JULIAN SPRUNG MARINE

C-BALANCE

- Two part solution that replenishes calcium, alkalinity, major and minor trace elements.
- Unlike other two part calcium/alkalinity supplements.
- Promotes optimal conditions for stoney corals and coralline algae.
- 5mls per 75litres daily until proper calcium and alkalinity levels are achieved, use thereafter will depend on calcium and alkalinity (carbonate hardness) levels.

CODE	SIZE	Ctn
CB2A	500mL	12
CB2C	946mL	4

KALKWASSER

- Replenishes calcium and maintains alkalinity.
- Maintains pH, precipitates phosphates and enhances protein skimming.
- ¼ teaspoon per 200 litres depending on calcium and alkalinity requirements.
- Use with the Two Little Fishies KW reactor for supreme efficiency.

CODE	SIZE	Ctn
K2B	500gm	6
K2C	2KG	6
K2L	11.4KG	N/A

CALCIUM CONCENTRATE

- Concentrated liquid calcium supplement.
- Formulated to balance calcium and alkalinity/carbonate hardness levels.
- 5mls per 40 litres raises calcium by 15ppm.

CODE	SIZE	Ctn
CA2	500mL	12

STRONTIUM CONCENTRATE

- For the development of calcareous skeletons in corals and organisms that use calcium to build their structures.
- Does not contain molybdenum.
- Concentrated formula.
- 5mls per 400 litres weekly depending on stock load.

CODE	SIZE	Ctn
SC4	250mL	12

MAGNESIUM CONCENTRATE

- An essential pH-stabilizing component of the seawater buffering system.
- Essential for photosynthesis in plants.
- 5mls per 40 litres raises magnesium by 5ppm.

CODE	SIZE	Ctn
MC2	500mL	12
