FRY STARTER

- Excellent as a first food for newly hatched fry.
- Contains a variety of sizes of micro particles suitable for both egg layers and livebearers.
- Large selection of ingredients, which stay in suspension longer. Better food, great for fussy eaters.
- Feed newly hatched fry at least 3 times daily. 3 or 4 drops may be sufficient dependent on aquarium size and fry numbers.

BIO-START

- For starting up new aquariums without putting fish at risk.
- Bio-Start can be added to a new aquarium ideally along with inoculation of either freshwater or marine strains.
- Develops nitrifying bacteria by adding ammonia based compounds as a feed source to build numbers of nitrifiers.
- Food for nitrifying bacteria.
- Add 1mL per 20 litres each day for 7 days.

AQUA-BOOST NATURAL MINERAL LIQUID FERTILIZER

- Aqua-Boost is a totally natural product comprised of natural minerals with very unique properties.
- Flocculates, coagulates, absorbs and attracts small particles in the water column.
- Extremely high surface area of approx 450m² per gram enabling it to absorb over 1000 times its own weight.
- High surface area makes it an ideal home for bacteria of all species.
- Dose Rate: 1ml per 3 litres of aquarium water.
