

PHOSPHAT-E

- Eliminates reactive phosphate from all marine fish and reef aquaria
- Begins to eliminate reactive phosphate immediately upon addition to the aquarium
- Safe for all inhabitants of both reef and marine fish only aquaria
- Each ml eliminates 1ppm phosphate in 15L of water, 250ml treats 3785L
- Helps facilitate removal of phosphate from aquaria during periods when dissolved organic material is abundant
- May be used on an ongoing basis to help control phosphate in heavily stocked aquaria

CODE	SIZE	Ctn
POE250	250ml	12
POE500	500ml	12

REEF BIOFUEL

- Helps maintain a balance of nutrients in aquariums.
- Indirectly benefits corals and other suspension feeding invertebrates by encouraging reproduction of bacterioplankton.
- Encourages polyp-expansion in corals.
- May be used to expedite biological filtration in new applications.

CODE	SIZE	Ctn
BIO250	250ml	12
BIO500	500ml	12

KORALAGOON SUBSTRAT

- Simulates the natural substrate particle profile of tropical and reef lagoons.
- Encourages biochemical reactions eg nitrification and de-nitrification.
- Encourages the growth of reef building organisms and stabilises pH.

CODE	SIZE
KSUB1400	1.4kg
KSUB5.4KG	5.4kg
