

## MAZZEI VENTURIS

- An efficient and reliable way to inject virtually any liquid or gas into water.
- Used for the injection of air, oxygen or ozone.
- PVDF Kynar construction.
- Ozone compatible.

CODE	DESCRIPTION	CONNECTIONS
684	mazzei venturi / injector kynar	20mm
978	mazzei venturi / injector kynar	25mm
1584A	mazzei venturi / injector kynar	40mm
2081A	mazzei venturi / injector kynar	50mm

## TURBO-VENTURI

- Inexpensive venturi that is perfect for small protein skimmers and koi ponds.
- Ozone resistant and constructed of moulded ABS plastic.

CODE	DESCRIPTION
VK	Turbo venturi 15mm F/M connections
VVTURBO	Turbo venturi 20mm F/M connections

## PVC VENTURI

- High volume venturi for minimum resistance to water flow yet high aeration effect.
- 20mm R/C fitting slip over ends to connect.

CODE	DESCRIPTION
4734	Venturi ( 3/4" in/out x 3/16" air)

## VENTURI TEES

- Engineered to entrain the greatest amount of air with the least resistance to water pressure.
- Can be used to draw in liquids or gasses, including ozone.
- Made from PVC with standard female slip connections.

CODE	DESCRIPTION
4738	Venturi tee ( 20mm x 25mm out x 20mm air)
4732	Venturi tee ( 40mm in/out x 20mm air)
