

# AQUASONIC

*Caring For Aquatic Life*

## **DEAR VALUED CUSTOMERS,**

Welcome to our new catalogue.

Aquasonic sincerely appreciates your interest in our products & our aim is to help you in any way possible to service your particular requirements. If you are a new customer I am sure you will find our catalogue very informative.

Aquasonic are now in their 41st year of supplying quality products to the aquarium, aquaculture, and many associated aquatic industries and are still owned & operated by the original owner. We are proud of our service to these industries and commit to continue and improve with experience.

Many of our products are totally Australian made – all excellent quality and carry the “Australian Made” symbol. By buying these Australian products, you are assured that the money spent stays here in Australia. As director of this great company, Aquasonic, I firmly believe in selling quality products. There are many, many products available worldwide, within your particular industry & for your individual requirements. However, as we all know, many of these products are of very inferior quality, cheap and can cause problems, often only within a very short time of purchase.

With this in mind and thinking of you, the end user, Aquasonic continue to source quality products from many different companies, worldwide. We also strive to use suppliers that are experienced, dedicated & efficient. Another important factor in supplying quality products, is to give our customers a choice. If you require an item that is not in our new catalogue, please enquire with one of our experienced sales team who will endeavor to source it for you. From tiny switches that can save you a lot of time & money in protecting livestock with their use, to a huge variety of pumps, from drop test kits to elaborate electronic water monitoring equipment, Aquasonic aim to supply to all ranges of budgets and technology requirements.

We have, for many years been supplying many universities, teaching and educational institutions, both here in Australia & overseas. We are very proud that many of our products are used as teaching tools and that they are an important part of the learning of many students.

If you require information on diseases, water quality, systems design or just an experienced opinion on a topic or on a product, our sales technicians would be pleased to hear from you.

I would like to thank all of Aquasonic’s customers for their interest in our great products. I feel very honored to have so many dedicated customers & look forward to continually being of service to you to all.

Thank you

Susan Carson  
(Owner/Director)
